## Information on Substances of very high concern (SVHC) and REACH

Dear customer,

thank you for your request concerning SVHC under the REACH regulation.

On 28 October 2008 the European Chemical Agency (ECHA) released the so called "candidate list" of potential substances of very high concern (SVHC).

The last update of this list was done in January 2023. More detailed information about the chemical substances you will find on Link:

<http://echa.europa.eu/web/guest/candidate-list-table>

Now we would like to inform you about the absence/presence of these substances in our products:

- The substances which are currently listed in the SVHC list are not present in our products, respectively they are below the REACH threshold of 0.1 %.
- If chlorobutadien (CR) rubber articles contain Imidazolidine 2-thione (CAS No.: 96-45-7) above threshold of 0.1 % you will be contacted by the respective customer service separately.
- If silicone rubber articles contain D4 (CAS No.: 556-67-2), D5 (CAS No.: 541-02-6) or D6 (CAS No.: 540-97-6) above threshold of 0.1 % you will be contacted by the respective customer service separately.
- If technical rubber goods contain para-tert-Butylphenol (CAS No.: 98-54-4) above threshold of 0.1 % you will be contacted by the respective customer service separately.
- If technical rubber goods contain 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol (CAS No.: 119-47-1) above threshold of 0.1 % you will be contacted by the respective customer service separately.
- If technical rubber goods contain N-(hydroxymethyl)acrylamide (CAS No.: 924-42-5) above threshold of 0.1 % you will be contacted by the respective customer service separately.
- Technical Rubber products of ContiTech Elastomer Coatings do not contain any of these substances in the recipe. Furthermore, none of these substances are listed in the MSDS of the used raw materials.

If you have any queries do not hesitate to contact us.
